The "UMA teknik makine sanayi LTD ŞTD" was established in year 2005 by three engineers. The "UMA teknik" as short, located in Istanbul/Turkey and produces solutions, provides technical support in infrastructure, mechanical, electrical, electronic field also in material and part procurement and supply primarily to textile industry and other industries.

The "UMA teknik" is providing faster and higher quality solutions with their two mechanical engineers, one electric/electronics engineer, twenty highly trained technicians, and three active mobile teams with a mechanical/electrical workshop.

Our Services:

- Machine Assembly and Disassembly
- Machine and Factory Transfer
- Machine Repair and Maintenance in the field of Mechanical, Electrical and Electronics
- Machine Modernization and Modification
- Machine Part Design and Manufacturing
- Consulting in Steam Production, Air-Conditioning and Energy Recovery
- Production of Electrical/Electronic Control Cards
- Procurement of various Materials and Supplies

Our Technical Services:

Our teams give technical services in Turkey and internationally. Our technical service team is located in Istanbul and reports to calls in 6 hours in Marmara region and also reports to domestic calls in 24 hour.

Our Disassembly, Assembly and Transfer Services:

Our services includes any type of facility and machine disassembly, transfer, building infrastructure, energy lines, assembly and turn-key solutions. If required we give consulting services in energy consumption/management, maintenance and production.

Our Machine Maintenance Services:

We provide maintenance services in three groups based on agreement types, preventive maintenance, periodic maintenance and break-down maintenance. If required we provide full coverage maintenance services.

Our Machine Modernization and Modification Services:

Based on the efficiency or necessity demand, we are capable of designing, producing (if needed replicating) mechanical, electrical and electronic part in our workshop.

Our Procurement Services:

We are capable of supplying broad range of spare parts and materials from domestic and/or international sources in very short notice.
